PROFESSIONAL SUMMARY

Dynamic IT Professional with 5+ years of experience in system administration and infrastructure support, including 3 years in Windows environments and 2+ years of hands-on experience with Linux administration. Skilled in server management, networking, Active Directory, DNS, DHCP, troubleshooting, and enterprise infrastructure support. Developing expertise in Cloud and DevOps with hands-on knowledge of AWS, Linux, Python, Docker and CI/CD concepts. Experienced in supporting production environments, resolving critical incidents, and maintaining system reliability and availability.

TECHNICAL SKILLS

- **Cloud & AWS:** AWS (EC2, VPC, IAM, EBS, S3, RDS), Security Groups
- **DevOps & Containers:** Docker, Kubernetes, Jenkins, CI/CD Pipeline
- **Programming & Automation:** Python, Bash Scripting, Cron Jobs
- **Linux & Web:** Ubuntu Linux, Nginx, SSH, systemd, LVM, Filesystem Management
- **System & Server Administration:** Windows Server, Active Directory (AD), Group Policy (GPO), OS Deployment, Server Virtualization
- **Control**: Git, GitHub.
- **Infrastructure as Code**: Terraform,
- **Monitoring & Logging:** Prometheus, Grafana
- **Networking & Security:** TCP/IP, DNS, DHCP, HTTP/HTTPS, Firewall Basics, Symantec Endpoint Protection,

PROFESSIONAL EXPERIENCE

System Engineer | Precision Tech serve Pvt Ltd. Apr '22 — Present

Madurai

- Provisioned and configured AWS EC2 Ubuntu instances, managing VPC configurations, Security Groups, SSH key authentication and post-launch server setup.
- Managed AWS S3 buckets for backup storage, application files and log archival, including bucket permissions and access policies.
- Worked with AWS EBS volumes for storage management, including attaching, mounting, resizing and filesystem expansion.
- Gained hands-on experience with Amazon RDS database concepts and AWS-managed database deployment.
- Developed Bash and Python automation scripts and scheduled Cron jobs for log backups, routine health checks and server administration tasks.
- Worked with Docker containerization concepts for packaging and deploying applications.
- Understanding Kubernetes concepts including container orchestration, deployments and services.
- Worked with Jenkins and CI/CD pipeline concepts for automated build, testing and deployment workflows.
- Used GitHub for source code management, repository maintenance, version control, and collaborating on scripts and infrastructure-related projects.
- Managed Ubuntu Linux servers including users, groups, permissions, sudo access, systemd services, disk utilization and filesystem administration.
- Supported Nginx web server administration and basic HTTP/HTTPS configuration.
- Managed deployment, patch update, OS installations, and routine maintenance across 200+ end-user systems
- Coordinated with internal IT teams, vendors, and third-party support teams to resolve complex technical issues

- Handled IP configurations, server network diagnostics, daily call logs, and weekly SLA reporting.
- Provided remote and on-site technical assistance while ensuring timely resolution of critical business-impacting issues
- Assisted with IT asset management, system replacements, hardware upgrades,
- Supported network troubleshooting involving TCP/IP, DHCP, DNS, VPN, LAN/WAN, and connectivity-related issues.

Desktop Support Engineer | Sky-pro Technologies Pvt Ltd. Dec '20 — Nov '21

Bengaluru

- Provided on-site technical support for Dell systems and acted as a liaison between client organization and Dell technical teams.
- Resolved high-priority service tickets within defined SLAs, managing Office 365 and email configuration.
- Executed domain migrations, DHCP/DNS configurations, data backups, and Windows OS deployment for corporate clients.
- Troubleshot hardware, software, networking, printer, and application-related issues for corporate users.
- Monitored and maintained Windows-based systems, network connectivity, and end-user devices to ensure smooth business operations.
- Assisted customers with product onboarding, software migrations, SAP support, and Microsoft mail configurations.
- Maintained IT asset records, documented incidents and resolutions, and coordinated with internal teams and vendors to ensure timely issue resolution.

KEY HIGHLIGHTS

- AWS & Linux: Hands-on knowledge of EC2, S3, EBS, IAM, VPC, RDS, Security Groups and Ubuntu Linux.
- DevOps Skills: Python, Docker, Kubernetes, Jenkins and CI/CD pipeline concepts.
- Infrastructure Scale: Successfully deployed and maintained over 400+ end-user systems across multiple sites.
- Virtualization: Played a key role in server virtualization and migration projects, reducing hardware dependency by 30%.
- Cloud & Infrastructure: Familiar with deploying, configuring, and managing cloud-based infrastructure and understanding core AWS services
- System Troubleshooting: Experienced in diagnosing and resolving OS, hardware, software, network, and server-related issues within defined SLAs.
